

Environmental & Sustainability Policy

Doing our part, one hire at a time

Version: 1.0 · **Reference:** APH-POL-ENV-1.0 · **Effective:** 09 September 2026 · **Next review:** September 2027

Ai Plant Hire Ltd is committed to reducing the environmental impact of hiring and running construction plant, and to helping our customers do the same.

Our commitments

- **Modern fleet.** We run excavators and dumpers under three years old, meeting current EU Stage V emission standards, with lower fuel use and emissions than older plant.
- **Fewer miles.** We plan deliveries and collections by route and zone to cut empty running, and deliver same-day within our core area.
- **Right machine.** We advise customers on the correct size of machine so they are not burning fuel in an oversized unit.
- **Less idling.** Handover includes guidance on reducing idling and using eco modes where fitted.
- **Spill control.** Every machine is checked for leaks before delivery. Fuel and oil are stored and handled to prevent ground contamination.
- **Waste.** Oil, filters, batteries, tyres and metal are recycled through licensed waste carriers.
- **Suppliers.** We buy from manufacturers and dealers with published environmental commitments.
- **Compliance.** We meet our duties under the Environmental Protection Act 1990 and the waste duty of care, and store fuel and oil in line with the oil storage regulations.

What we measure

Fleet age, fuel dispensed per hire day, delivery miles per hire, and any spill or environmental incident. We review these each year and set targets for improvement.

Looking ahead

We will add electric and hybrid machines to the fleet as they become practical for our customers, and offer them at parity pricing where we can.

Responsibility

Major Singh is responsible for this policy. It is reviewed annually.
